

FORD Meter Test Bench Recirculating System

Product Release

05/2017

Save Water with the Ford Water Meter Test Bench Recirculating System

Designed to reuse water through the use of a two tank system, the Ford Recirculating System seamlessly integrates with any Ford AMS Test Bench.

Recirculating System for Standard and Indianapolis Test Benches:

- Vertical turbine pump with frequency speed control
- Low water alarm with auto pump shut-down
- All equipment pre-mounted at factory on structural steel skid
- Reversible frequency drive mount to facilitate left-hand or right-hand mounting
- Cam-Loc pipe connection fittings
- Push-Loc rubber hose connections for return line
- Corrugated stainless steel supply tubing
- Poly water supply tank

System includes:

- Cam-Loc pipe connection fittings for main pump suction and supply
- Cam-Loc pipe connection fittings for drain pump suction
- Hose connections for drain pump return line
- Corrugated stainless steel suction and bench supply tubing
- Various electrical control cables required for operation
